Adhesive performances

Adhesive has a strong final adhesion on a wide range of substrates.

Once applied to the substrate on removal, an irreversible and dry "void" footprint message will detach itself from the face film. Labels which have been removed cannot be reapplied since repositioning will leave visible proof that tampering has taken place.

Customised footprint messages in the form of text or graphics are available on request.

Preliminary tests have to be done on the substrate in real conditions of use and approved by customers.

Printing and conversion

The top coated of this face-stock allows all the conventional printing as well as thermal transfer. Excellent conversion characteristics on flatbed and rotary presses.

Shelf life

One year when stored at 22 °C and 50%RH.
