

Fasson EXACT™

Your partners in productivity, profitability and growth.

The limitations of ordering from a traditional master roll are legendary and costly to your business. You can't use the full master roll effectively day in and day out, you build surplus roll on the floor and you are constantly carrying extra trim losses. Fasson EXACT™, a unique program pioneered by Avery Dennison in the mid 1990's, overcomes these issues by letting you purchase EXACTly what you want.

Your Advantages:

- Saving up to 10% of total order cost through reduced trim waste.
- Inventory reductions of up to 80%, saving you 3–7% on your material costs.
- Streamlined operations with materials staged directly to press.
- Reduced obsolescence with fewer "write offs" and improved balance sheet.
- Total savings potential of up to 31% of purchasing spend.
- Simplify your order planning – order exactly the widths you require and leave the roll width optimisation to us.

Our Service:

With Avery Dennison, you can have whatever width you want at a specified length on selected core Fasson products. (For current offering please consult the Fasson Product Services Guide). Simply place your orders by 2pm and EXACT products can be dispatched the next working day for normal orders. Minimum order quantities can be as small as one cheese when combined with another order of at least 500m².

EXACT items can be purchased from an interstate distribution centre, subject to a freight surcharge of \$75.00 per delivery for orders under 1000m². Orders of 1000m² or greater will not incur this surcharge.

Should an EXACT service not be available on the particular product you require then consider Fasson Ready Width or Fasson Half Master programs.

	Without Fasson EXACT	With Fasson EXACT	Your Savings
 Trim savings	 Depending on the master roll width, your side trim can be large.	 Your side trim is minimal.	2 - 10%
 Reduced administrative and cost handling	 You waste time and resources on adapting your trims to the master roll.	 As the master roll is no longer a limitation, there is no need for complex roll arrangements.	2 - 6%
 Inventory reduction	 You need to buy extra rolls just to match the master width.	 You no longer need to combine cuts, saving on surplus materials.	3 - 7%
 Reduced warehousing	 You need space and resources to store the surplus materials.	 Without any surplus, you save on money and storage space.	1 - 4%
 Reduced obsolescence	 The surplus materials usually age and eventually need to be discarded.	 Without any surplus, there is no need to discard aged materials.	1 - 4%
Total measurable savings potential			9 - 31%
