Adhesive has a strong final adhesion on a wide range of substrates.

Once applied to the substrate on removal, an irreversible and dry "void" footprint message - will detach itself from the face film. Labels which have been removed cannot be reapplied since repositioning will leave visible proof that tampering has taken place.

Preliminary tests have to be done on the substrate in real conditions of use and approved by customers.

Conversion and printing

Excellent conversion characteristics on flatbed and rotary presses.

Shelf life

1 year at 22 °C and 50°HR
