

REDUCED MINIMUM ORDER QUANTITY PROGRAMS

Your partners in productivity, profitability and growth.

Reduced Minimum Order Quantities? We hear you!

Where you have short run jobs consuming high value labelstocks, traditional master rolls may provide surplus material to your requirements. While Fasson EXACT™ allows you to order as little as one roll at a time, it is not suited to all products. As such, you often have only two choices - either pass on the extra costs to your customer, or place excess material into stock.

Now Avery Dennison not only provides you Fasson EXACT but also Fasson Ready Width™ and Fasson Half Master™ programs, specifically designed to give greater order flexibility and increase your profitability. These options are delivered via your local Avery Dennison distribution centre, and provide significantly reduced minimum order quantities on a wide range of products.

Our Service:

Fasson EXACT

Your customer wants a label of a certain size, your pressure-sensitive label supplier makes master rolls of a certain width and the converter is stuck in the middle trying to maximize the use of a roll. Sound familiar? With Fasson EXACT you can order whatever width you want at a specified length on selected Fasson core products, thereby helping to eliminate this problem.

Fasson EXACT gives you the following benefits:

- Roll widths sized to fit your needs and your bottom line.
- Savings on your total order cost through reduced trim.
- Reduce inventory, saving you 3 – 7% of your material costs.
- Streamline operations.
- Savings on your total purchasing spend.

For full details on Fasson EXACT products please consult your Fasson product services guide.

Fasson Ready Width™

Ready Width complements our Fasson EXACT service. Using Ready Width material, converters can purchase a match or near match to their desired width requirement. For example, a converter that needs a 270 mm width roll may find we have a 275 mm Ready Width roll available. This saves them the expense of purchasing a full master roll, eliminating the waste of excess inventory, while meeting their quick turnaround needs.

A range of widths may include the following sizes: 125, 143,166,180, 200,225,250,275,300 & 333 by different program lengths, see the product services guide for width and product details.

More than just what cuts out neatly from a 1 metre decal, Fasson Ready Width we're ready..... are you?

Products available from a Ready Width platform may also be purchased on a "Conditional EXACT" basis. Conditional EXACT is any width at the Ready Width length, subject to Avery Dennison approval and the signing of a slit and hold agreement. Stocked at your local Distribution Centre, this service is offered "conditional" to a review of volumes and slit widths.

Fasson Half Master™

Fasson Half Master products can be ordered at either half their normal width or half their normal length.

i.e. Offering a half roll Width of 750mm by 1000 m length. (Hotmelts)

Or

Offering a half roll length 500m by roll width (usually 1000mm). (Emulsions / solvents)

This saves converters the expense of purchasing a full master roll and thereby helping to eliminate excess inventory and also provides flexibility on slit widths.

See the Fasson product services guide for full program details.

Please Note:

Minimum Ready Width™ order quantity is 500m², but this can be made up of any combination of the above products. Single cheeses can be purchased if combined with another delivery / order (normal full order).

A freight surcharge of \$75.00 per delivery is chargeable for EXACT, Ready Width & Half Master products purchased from an interstate distribution centre under 1000m². Orders of 1000m² or greater will not incur this surcharge.
